PROFESSIONAL PROFILE

I am an enthusiastic and focused instructional designer and learning design professional with a focus on emerging technologies. My goal is to fuse the engaging design of marketing and outreach materials with educational content to create captivating training. I enjoy making to-the-point training programs that function as an essential instructional tool while also being a pleasure to experience.

EXPERIENCE

Senior Learning Technologist
Tripadvisor (2022 – Present)

Administers development and training for over 3,000 employees, including creation of video content, the upkeep and design of our training platform, and relationships with vendors.

- Designed an award-winning Manager Development Program including videos, training materials, and landing pages with over 200 successful completions
- Implemented interactive orientation and onboarding programs welcoming over 1,000 new employees into the business

Learning and Development Specialist
Raley's / Bel Air / Nob Hill (2020 – 2022)

Developed over 50 hours and 30 modules of training materials for over 13,000 corporate and store-based employees using video, illustrations, learning guides, and online courses.

- Improved upon extensive library of existing courses by redesigning content, reassessing goals, applying current design practices, and effectively using video, interactions, and microlearning theory.

Instructional Designer
Western Institute for Food Safety and Security, UC Davis (2015 – 2020)

Partnered with specialists in fields ranging from biotechnology, veterinary science, and disaster response to communicate scientific research to farmers, dairy producers, and undergraduates.

- Created educational and promotional materials including videos, presentations, and online courses for far-reaching programs such as FSMA and NADPRP, training a new generation of food-safe farmers and agricultural professionals.
